

January 23, 2014

The work on the water leak on Primrose is anticipated to start on Friday, 1/24/14. Water may be shut off for most of the day starting around 9:00. This will only impact the west side. Lake Trail East and Alpine will not be impacted. We will notify you when water service is restored.

When water service is restored, it will be necessary to drink only boiled or bottled water until we notify you that the water has been tested as per state regulations. Also, let your water run until it is clear before using a washing machine or dish washer as sediment can be disturbed by this kind of work.

Thanks,
Rick
